Walk On Bark

Walk On Bark is derived from raw fir bark and is ground and screened to size. The Walk On Bark is more natural in appearance than the nugget barks. Most of the bark chips are flat and it has a small percentage of wood fiber. This product is very popular in commercial jobs due to the lower cost as well as the overall way it wears.

- **Walk On Bark is natural reddish-brown in color. Both light browns as well as some darker browns.**
- **The particle sizes range from 1" - 4"**
- **The average full load size is 100 cy**

Sincerely,

David Ray
